The door width usually determines the spring strength. If there are unusual site conditions, e.g. high or exceptionally heavy doors or wind pressure, the next stronger spring size should be selected.

Product Features and Functions:

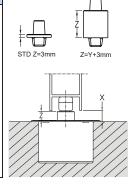

- Controlled closing from 175° is provided by dual thermostatic control valves with special hydraulic fluid
- Closer is protected by a pressure relief valve to avoid damage caused by forced closing
- Selective hold open between approx 75° and 175°
- Selectable delayed action between 175° and approx 75° (Delayed action is functional when hold-open is not engaged)
- Adjustment of hold open start or when delayed action is released. Adjustable from approx 75° to approx 105°
- Mechanical backcheck at approx 70°

- 1. Valve adjustment for closing speed from approx 70° to 0°
- Valve adjustment from 175° to approx 75°
 a)* Selective hold open between approx 75° and 175°
 b)* Selectable delayed action between 175° and 75°
- 3. Start of hold open/End of delayed action range adjustment. Adjustable from approx 75° to approx 105°
- 4. Mechanical backcheck at approx 70°

^{*} Turning valve to the right creates a longer delay time and slows down the closing speed. Turning valve completely to the right creates hold-open and eliminates delayed action.
